

# Does COPD Cause Fatigue?

by NEWLIFEOUTLOOK TEAM

---

## COPD Fatigue Facts

If you have shortness of breath in COPD, it's likely that you also feel a great deal of fatigue. By improving your airflow with breathing positions, pulmonary rehabilitation, and breathing techniques such as pursed lip breathing, you will likely notice you're not as fatigued. The more efficient you are at getting oxygen into your body and the more effectively your muscles use oxygen, the more you'll be able to do. Your muscles can learn how to effectively use oxygen with exercise but you may have issues with exercise due to your shortness of breath as well. Practice breathing techniques until they're second nature so you can easily rely on them when you're exercising. Start off exercising with what you can do and then improve upon that gradually.

## Some Conditions with fatigue as a symptom

|                          |                     |
|--------------------------|---------------------|
| Medications              | Fibromyalgia        |
| Pain                     | Lupus               |
| Sleep Disorders          | Multiple Sclerosis  |
| Substance Abuse          | Anemia              |
| Astropia                 | Adrenas             |
| Arthritis                | Depression          |
| Cancer                   | Parkinson's Disease |
| Diabetes                 | COPD                |
| Chronic Fatigue Syndrome |                     |

|           |           |
|-----------|-----------|
| Tired     | Worn-Out  |
| Weak      | Heavy     |
| Exhausted | Slow      |
| Weary     | Lethargic |

### Fatigue is:

- Lack of Motivation
- Lack of Energy
- Wearing Out Easily
- Real.

### Fatigue isn't:

- Lack of Passion
- Laziness
- Just Being Tired
- Fake or Imagined

### Fatigue Can Affect:

- Your mood
- Physical function
- Work performance
- Social interaction
- Family care
- Cognitive performance
- School work
- Community activities
- Sense of self
- Troust appetite

The **Fatigue Severity Scale (FSS)** is a self-reported questionnaire used to measure your fatigue. It consists of ...

# NINE Questions,

each rated on a scale of

# 1-7

To score the Fatigue Severity Scale either add all items together (this will range from 9-63) or find the mean by adding your items together and dividing by 9 (this will range from 1-7)

In either case, the **higher the number** you calculate is, the **more the fatigue** you are.

- 

### 1. **Sanuity & Quality of Sleep**

  - ✓ Have a regular bed time and wake up time
  - ✓ Only get up for sleeping
  - ✓ Do quiet activities if you don't sleep
  - ✓ Room should be dark and quiet
- 

### 2. **Proper Nutrition**

  - ✓ Get daily value of vitamins and minerals
  - ✓ Find out about proper nutrition at [choosemyplate.gov](http://choosemyplate.gov)
